

Ben Fortescue, a 14-year-old freshman from Central Mountain High School has been diagnosed with Stage III Hodgkin's Lymphoma. Ben is a soccer player on the CMHS boys' soccer team. His parents are Mindy and Joe, and he has two sisters Charlotte (6th grade) and Adrian

(freshman in college). Ben's faith throughout this process has been amazing. He tells anyone that asks, "God and I have got this." He is a remarkable young man that says that this is just a bump in the road for him, and he is going to use his story to inspire others in the future.

Our "Change for Change" in October is going to go to this family in their fight against this awful disease. Please help this family in any way you can to help offset the costs that will include multiple trips to and from medical facilities, overnight stays when needed, and large medical bills.
